#### Introduction

Progress to university with NCC Education qualifications.

Originally established as an initiative by the British Government in 1966, NCC Education is a UK awarding body and global provider of education.

Working with some of the world's leading British academics and industry, the NCC Education qualification portfolio is continually expanding to align with the ever-growing needs of employers and higher education institutes alike.

Offered by a network of over 200 accredited partner centres around the world, our qualifications allow students to continue their studies with an accredited partner centre, online, overseas or at an international branch campus in-country.

We are now recognised by over 90 universities, institutes, and business schools in many countries, including the UK, Australia, Canada, Cyprus, Ireland, France, Germany, Japan, New Zealand, and the USA. Students are also eligible to apply to several international branch campuses, including campuses in China, Malaysia, Mauritius, Singapore, UAE, Uzbekistan, and Vietnam.

This enables students to apply for an undergraduate degree programme in year 1 or with advanced standing/credit exemptions towards years 2 or 3. There are also a range of options for students looking to study at postgraduate level.

If you need further advice on progressing to further study with your NCC Education qualification, you can contact our customer support team in one of the following ways:

**Note:** Many other universities will accept NCC Education qualifications, this booklet simply lists those with whom we have formalised recognition or agreements.

Carroll University | Waukesha, Wisconsin

# BENYAPA KHOWPINITCHAI '20

Major: Biology | Minors: Art, Mathematics and Biochemistry

"I have engaged in both internal and external research opportunities throughout my time at Carroll. I have worked on multiple research projects with biology faculty. Additionally, I have also interned at various external research institutions, including the Medical College of Wisconsin and the Harvard University Stem Cell Institute. From my experience conducting research studies off-campus, I learned that despite coming from a small liberal arts college, I have been sufficiently prepared to carry out a well-designed research project and produce reliable findings like those from prestigious universities. Thanks to the International Scholarship I have received from Carroll every year, I can engage in this unique and amazing college experience."

After successful completion of NCC Education's Level 4 and Level 5 Diplomas, I began the Top-Up year or Level 6. The UCLan BSc (Hons) Business Computing and Information Systems was the first time I ever studied online, and I was nervous about how different it would be from in-person learning. NCC Education provided all the resources and assistance needed for a smooth transition. Studying online was a great experience that taught me a lot about myself, selfdiscipline and time management. Through the virtual learning environment, I had the chance to meet new people from all around the world and work with highly qualified professors.

 Completed the BSc (Hons) Business Computing and Information Systems Top-Up degree - delivered online by NCC Education and validated and awarded by the University of Central Lancashire (UCLan).

- Started the Level 4 NCC Education Diploma in Computing Studies with MCCi, Yangon Myanmar
- Graduated from the University of Greenwich with a 2:1
