

# LEVEL 3 DIPLOMA IN COMPUTING (L3DC)

NCC Education Qualification Unit Specification **2023** 

.....

# LEVEL 3 DIPLOMA IN COMPUTING

### **Modification History**

| Version | Revision Description  |
|---------|---|
| V1,8    | Update to TQT and new cover   |
| V1.9    | Added 4.6 – Eligibility Period  |
| V2.0    | Added 'Objective' in section 1.1 – 22/05/2019   |
| V2.1    | Added grading algorithm statement in Section 6 Results and Certificates                           |
| V2.2    | Replacing IT Skills with Culture Studies, and Mathematical Techniques with Foundation Mathematics |
| V2.3    | Updated NOS January 2020  |
| V2.4    | Updated Ofqual link in Section 1.1 and removal of Northern Ireland regulation (April 2020)        |
| V2.5    | July 2023 - updated wording of entry requirements   |

# 1. About NCC Education

NCC Education is a UK awarding body, active in the UK and internationally. Originally part of the UK National Computing Centre, NCC Education started offering IT qualifications in 1976 and from 1997 developed its Higher Education portfolio to include Business qualifications, IT qualifications for school children and a range of Foundation qualifications.

With Centres in over forty countries, four international offices and academic managers worldwide, NCC Education strives to employ the latest technologies for learning, assessment and support. NCC Education is regulated and quality assured by Ofqual (the Office of Qualifications and Examinations Regulation, see <u>www.ofqual.gov.uk</u>) in England.

#### 1.1 Why choose this qualification?

NCC Education's Level 3 Diploma in Computing is:

• **Regulated** by Ofqual and listed on the Qualifications and Credit Framework – Qualification Number 600/6407/9. The Regulated Qualifications Framework (RQF) is a credit-based qualifications framework, allowing candidates to take a unit-based approach to building qualifications.

For more information see:

https://www.gov.uk/what-different-qualification-levels-mean/list-of-qualification-levels

- Quality assured and well established in the UK and worldwide
- **Recognised and valued** by employers and universities worldwide

• The NCC Education Level 3 Diploma in Computing (RQF) is an Applied General qualification which allows candidates to demonstrate key transferrable study skills, mathematical competency and applied cultural understanding, especially in the area of digital culture, as well as an understanding of the essential concepts of computer programming.

#### Objective

In addition, successful candidates will fulfil the main entry requirements for NCC Education's Level 4 Diploma in Computing or Level 4 Diploma in Business IT, as well as opening up opportunities to access a range of higher education courses or employment. Examples of higher education opportunities include, but are not limited to, progressing to university degrees in Software Engineering or Computer Science, Computer Networking Systems, Digital Media Technology, Computer Forensics and Security. Examples of employment opportunities include roles such as IT Helpdesk Professional, Data Entry Clerk, IT Support Technician and Computer Service and Repair Technician.

The Level 3 Diploma in Computing syllabus and assessment is suitable for students aged 16-19 as well as adult learners.

The above purpose is stated in the Qualification Specification, Section 1.1, Page 4. The Qualification Specification is published on the NCC Education website at: <u>http://www.nccedu.com/our-qualifications/foundation/ncc-education-level-3-diploma-in-computing-(qcf)</u>

# 2. Structure of the L3DC Qualification

| Qualification Title, Credits, Units and Level     |   |                                 |  |  |  |  |  |
|---|---|---------------------------------|--|--|--|--|--|
| NCC Education Level 3 E<br>Level 3.               | NCC Education Level 3 Diploma in Computing (RQF), 60 credits, all at RQF Level 3. |                                 |  |  |  |  |  |
| Total Qualification Time:                         | 600 hours   |                                 |  |  |  |  |  |
| Guided Learning Hours:                            | 305 hours.  |                                 |  |  |  |  |  |
| Candidates must pass al certificate.              | Candidates must pass all 5 Units to be awarded the L3 Diploma in Computing        |                                 |  |  |  |  |  |
| Study and<br>Communication Skills<br>(20 credits) | Foundation Mathematics<br>(10 credits)  | Culture Studies<br>(10 credits) |  |  |  |  |  |
|   |   |                                 |  |  |  |  |  |

Please see Section 5 below for Syllabuses, which include the Guided Learning Hours and Total Qualification Time for each Unit of the Level 3 Diploma in Computing.

Introduction to Computer Science

(10 Credits)

This qualification is regulated by Ofqual and listed on the Qualifications and Credit Framework – Qualification Number 600/6407/9. For further information see <a href="http://register.ofqual.gov.uk/Qualification/Details/600\_6407\_9">http://register.ofqual.gov.uk/Qualification/Details/600\_6407</a>

### 3. Assessment for the qualification

### 3.1 Assessment objectives

All assessment for the qualification is intended to allow candidates to demonstrate they have met the relevant Learning Outcomes. Moreover NCC Education's assessment is appropriate to the assessment criteria as stated in this specification and is regularly reviewed to ensure it remains consistent with the specification.

### 3.2 Overview of Qualification Unit Assessment

| Unit                             | Assessment Methods |                    |                   |  |  |
|----------------------------------|--------------------|--------------------|-------------------|--|--|
|                                  | Local Examination  | Global Examination | Global Assignment |  |  |
| Study and Communication Skills   | -                  | -                  | 100%              |  |  |
| Foundation Mathematics           | -                  | 100%               | -                 |  |  |
| Culture Studies                  | -                  | -                  | 100%              |  |  |
| Introduction to Computer Science | -                  | 100%               | -                 |  |  |
| Introduction to Programming      | -                  | -                  | 100%              |  |  |

An examination is a time-constrained assessment that will take place on a specified date and usually in an NCC Education Centre. An assignment requires candidates to produce a written response to a set of one or more tasks, meeting a deadline imposed by the Centre.

The overall Unit mark is computed from the weighted mean of its components. The pass mark for a Unit is 40%.

NCC Education Centres can provide candidates with a specimen assessment paper as well as a limited number of past examination and assignment papers.

Past examination and assignment papers may be made available only following results release for the corresponding assessment cycle. Results release dates and past examination and assignment release dates can be found in the Activity Schedules area of *Candidate Registration Portal*, NCC Education's student registration system.

### 3.3 Accessibility of Assessment

We review our guidelines on assessment practices to ensure compliance with equality law and to confirm assessment for our Units is fit for purpose.

### 3.3.1 Reasonable adjustments and special consideration

NCC Education is committed to providing reasonable adjustments and special consideration so as to ensure disabled candidates, or those facing exceptional circumstances, are not disadvantaged in demonstrating their knowledge, skills and understanding.

Further information on NCC Education's arrangements for giving reasonable adjustments and special consideration can be found in the NCC Education *Reasonable Adjustments and Special Considerations Policy*.

### 3.3.2 Supervision and Authentication of Assessment

NCC Education Centres are required to organise all assessment activity for this specification according to NCC Education's Policies and Advice.

Candidates' identity and the authenticity of their work is verified and NCC Education moderates all assessment to ensure that the marking carried out is fair, and that the grading reflects the standard achieved by candidates as relevant to the specification Learning Outcomes and Assessment Criteria. Detailed guidance on this process and how candidate work must be submitted to NCC Education is given in NCC Education's *Examination Guidelines* and *Moderation Manual*. The Moderation Manual also includes full reminder checklists for Centre administrators.

### 4. Administration

### 4.1 Assessment Cycles

Four assessment cycles are offered throughout the year, in Spring, Summer, Autumn and Winter.

Examination dates and assignment submission deadlines are published in the NCC Education *Activity Schedule*, which is provided to Centres by Customer Services. It is also available on *Candidate Registration Portal*, NCC Education's student registration system.

The *Activity Schedule* also gives the key dates for registering candidates for assessment cycles, the dates when Centres can expect the assessment documentation and, ultimately, the assessment results from NCC Education.

#### 4.2 Language of Assessment

All assessment is conducted in English.

#### 4.3 Candidates

NCC Education's qualifications are available to those Centre candidates who satisfy the entry requirements as stated in this specification.

#### 4.4 Qualification and Unit Entry Requirements

#### **Entry Requirements**

For entry onto the NCC Education L3DC qualification, Students must meet the following entry requirements:

- Completed their GCSE/IGCSE 'O' Levels or an equivalent\* qualification in their own country and passed 5 subjects with minimum grades of 'C', '4' or equivalent\* in each. These should include Mathematics and English.
- Have a valid score of 5.5 or above in the International English Language Testing System (IELTS) examination or equivalent for students whose first language is not English. Alternatively, students can take the free NCC Education Higher English Placement Test which is administered by our Accredited Partner Centres.

The Level 3 Diploma in Computing syllabus and assessment is suitable for students aged 16-19 as well as adult learners.

\*Centres need to provide evidence to justify any equivalency decision (both qualification equivalency and grade equivalency) they make pertaining to any enrolments via non-GCSE or non-standard routes.

### 4.5 Candidate Entry

Candidates are registered for assessment via NCC Education's *Candidate Registration Portal* system and according to the deadlines for registration provided in the *Activity Schedule*.

Further details can be found in NCC Education's Operations Manual.

### 4.6 Eligibility Period

The maximum period of time that NCC Education allows for the completion of your programme is three years. Please contact your Accredited Partner Centre if you have any queries relating to this.

#### 4.7 Resits

If a candidate fails an assessment, they will be provided with opportunities to resit during the eligibility period.

Candidates may only seek reassessment in a previously failed Unit.

| 4. | Understand the fundamentals of Differential Calculus | 4.1  | Explain the rate of change of one variable in respect of another          |
|    |  | 4.2  | Calculate the gradient of a curve using differentiation                   |
|    |  | 4.3  | Plot maximum and minimum turning points using graphs                      |
|    |  | 4.4  | Identify the maximum and minimum turning points using differentiation     |
| 5. | Understand the fundamentals of Integral Calculus     | 5.1  | Recognise integration as the inverse of differentiation                   |
|    |  | 5.2  | Recognise the constant of integration                                     |
|    |  | 5.3  | Evaluate the constant of integration                                      |
|    |  | 5.4  | Evaluate the definite integral  |
|    |  | 5.5  | Calculate of the area under a curve                                       |

| 6. | Understand Measures of Dispersion             | 6.1 | Calculate the range, quartiles and quantiles                      |
|----|---|-----|---|
|    |   | 6.2 | Calculate the mean deviation                                      |
|    |   | 6.3 | Calculate the variance  |
|    |   | 6.4 | Calculate the standard deviation                                  |
| 7. | Understand the fundamentals of<br>Probability | 7.1 | Calculate probability using the addition and multiplication rules |
|    |   | 7.2 | Calculate the probability of compound events                      |
|    |   | 7.3 | Use tree diagrams to determine probability                        |
|    |   | 7.4 | Calculate probabilities of permutations and combinations          |

| Th | e Learner will:   | The Learner can:   |  |  |  |  |
| 1. | Understand fundamental<br>concepts relating to hardware<br>and software | <ul> <li>1.1 Describe the functions of a computer system</li> <li>1.2 Describe a range of computer systems or justify<br/>the use of a type of computer system for a<br/>particular purpose</li> </ul> |  |  |  |  |
|    |   | 1.3 Define the term 'hardware'   |  |  |  |  |
|    |   | 1.4 Describe the purpose or characteristics of<br>computer hardware  |  |  |  |  |
|    |   | 1.5 Define the term 'software'   |  |  |  |  |
|    |   | 1.6 Identify categories of software  |  |  |  |  |
|    |   | 1.7 Describe types of application software or justify<br>the use of application software for a particular<br>purpose   |  |  |  |  |
|    |   | 1.8 Describe types of system software or justify the use of system software for a particular purpose   |  |  |  |  |
|    |   | 1.9 Describe types of utility software or justify the use<br>of utility software for a particular purpose  |  |  |  |  |
| 2. | Understand the<br>characteristics of hardware                           | 2.1 Describe internal components of computer hardware  |  |  |  |  |
|    | components  | 2.2 Describe the components of a central processing unit (CPU)   |  |  |  |  |
|    |   | 2.3 Describe the functions of a CPU  |  |  |  |  |
|    |   | 2.4 Explain the function of the fetch-decode-execute cycle   |  |  |  |  |
|    |   | 2.5 Describe how hardware components communicate with each other   |  |  |  |  |
|    |   | 2.6 Identify units of measurements of computer storage   |  |  |  |  |
|    |   | 2.7 Describe a range of computer storage media or justify the use of a type of storage media for a particular purpose  |  |  |  |  |
|    |   | 2.8 Describe a range of input devices or justify the use of a type of input device for a particular purpose  |  |  |  |  |
|    |   | 2.9 Describe a range of output devices or justify the use of an output device for a particular purpose   |  |  |  |  |

| 3.        | Understand how data is                           | 3.1 Describe how data is represented by binary  |
|-----------|--|---|
|           | epresented in a computer                         | 3.2 Describe how data is represented by ASCII   |
|           | System   | 3.3 Describe how data is represented by Unicode   |
|           |  | 3.4 Explain how encryption can be used to represent data  |
|           |  | 3.5 Explain how compression can facilitate the storage and transmission of data   |
|           |  | 3.6 Explain the purpose of number systems   |
|           |  | 3.7 Explain the binary number system  |
|           |  | 3.8 Demonstrate addition or subtraction of binary numbers   |
|           |  | 3.9 Demonstrate an understanding of two's complement  |
|           |  | 3.10 Explain the hexadecimal number system  |
|           |  | 3.11 Demonstrate conversion between decimal, binary<br>or hexadecimal numbers   |
|           |  | 3.12 Describe how images are represented in a computer system   |
|           |  | 3.13 Describe how sound is represented in a computer system   |
|           |  | 3.14Explain how compression can facilitate storage and transmission of images or sound  |
|           |  | 3.15Define the term 'digital logic'   |
|           |  | 3.16 Explain the purpose and operation of logic gates   |
| 4         | Understand the fundamental                       | 4.1 Explain the purpose of a computer network   |
|           | concepts of computer<br>networks                 | <ul> <li>4.2 Describe types of computer network or explain<br/>the criteria for selecting a particular type of<br/>network</li> </ul> |
|           |  | 4.3 Describe the hardware used in a computer network  |
|           |  | 4.4 Describe the software used in a computer network  |
|           |  | 4.5 Describe the transmission media used in a computer network  |
|           |  | 4.6 Describe types of network transmission protocols  |
|           |  | 4.7 Describe types of computer network topology or  |
|           |  | justify the use of a topology for a particular<br>purpose   |
|           |  | 4.8 Describe Internet and World Wide Web technologies   |
|           |  | 4.9 Discuss computer network issues   |
| 5.        | Understand cultural, ethical                     | 5.1 Explain what a cultural issue is  |
|           | and legal issues relating to                     | 5.2 Describe a range of cultural issues   |
| computing | 5.3 Explain how cultural issues can be addressed |   |
|           |  | 5.4 Explain what an ethical issue is  |
| L         |  | 1   |

| 5. | 5 Describe a range of ethical issues   |
|----|--|
| 5. | 6 Explain how ethical issues can be addressed  |
| 5. | 7 Identify laws and guidelines that relate to computing  |
| 5. | 8 Describe situations where laws and guidelines<br>have been used to deal with people using<br>computers to commit crimes or cause offence |

#### Assessment

Global Assignment (100%)

### 6. Results and Certificates

The grade descriptors Pass, Merit and Distinction are awarded by Unit to successful candidates. A Pass is awarded for an overall Unit mark of between 40 and 59. A Merit is awarded for an overall Unit mark of between 60 and 69 and a Distinction is awarded for an overall Unit mark of 70 and above. Candidates who obtain an overall Unit mark of below 40 are classed as *failed* in the Unit and may resit (see *Section 5.6* above).

A final qualification mark will be awarded upon successful completion of all units. This is calculated by finding the average mark of all units that make up the qualification. Please note that in exceptional circumstances, NCC Education may be required to change the algorithm to calculate a final qualification mark for a learner in order to secure the maintenance of standards over time. Any necessary changes to this algorithm would be shared with Centres and learners promptly by NCC Education. An example is given below:

| Unit                             | Unit<br>Points | Candidate<br>Mark | Unit Points *<br>Candidate Mark |
|----------------------------------|----------------|-------------------|---------------------------------|
| Introduction to Computer Science | 10             | 86                | 860                             |
| Introduction to Programming      | 10             | 72                | 720                             |
| Culture Studies                  | 10             | 81                | 810                             |
| Foundation Mathematics           | 10             | 88                | 880                             |
| Study and Communication Skills   | 20             | 93                | 1860                            |
|                                  | 60             | 420               | 5130                            |

#### 5130/potential 6000 = 86

Grade Descriptors incorporate characteristics intended to provide a general indication of assessment performance in relation to each Unit's Learning Outcomes in this specification. The final Unit grade awarded will depend on the extent to which a candidate has satisfied the Assessment Criteria. A qualification is awarded when the candidate has achieved at least a pass in all Units.

After each assessment cycle, results slips are issued (in electronic format) which detail the grades achieved, i.e. Fail, Pass, Merit or Distinction (see *Appendix 2*). Certificates which contain your qualification grade and pass mark are then dispatched to Centres.

### 7. Further Information

For more information about any of NCC Education's products please contact <u>customer.service@nccedu.com</u> or alternatively please visit <u>www.nccedu.com</u> to find out more about our suite of high-quality British qualifications.

# **Appendix 1 Qualification Documentation**

The following NCC Education documentation has been referred to in this specification:

- Reasonable Adjustments and Special Considerations Policy
- Examination Guidelines
- Moderation Manual
- Activity Schedule
- Operations Manual

All documentation, together with access to NCC Education's online resources, is available to Centres and (where applicable) candidates who have registered for assessment.

# **Appendix 2 Grade Descriptors**

The grade descriptors Pass, Merit and Distinction are awarded to successful candidates. The following are characteristics intended to provide a general indication of assessment performance in relation to each Learning Outcome in this specification. The final grade awarded will depend on the extent to which a candidate has satisfied the Assessment Criteria overall.

| Learning Outcome           | Pass               | Merit               | Distinction            |
|----------------------------|--------------------|---------------------|------------------------|
| Create project             | Demonstrate        | Demonstrate ability | Demonstrate ability    |
| documentation.             | ability to perform | to perform the task | to perform the task to |
|                            | the task           | consistently well   | the highest standard   |

|                            |                    | consistently well  | highest standard    |
| Be able to solve a range   | Demonstrate        | Demonstrate        | Demonstrate ability |
| of basic Calculations      | ability to perform | ability to perform | to perform          |
| equations                  | techniques         | techniques         | techniques to the   |
|                            |                    | consistently well  | highest standard    |
| Be able to present data in | Demonstrate        | Demonstrate        | Demonstrate ability |
| graphical form             | ability to perform | ability to perform | to perform          |
|                            | techniques         | techniques         | techniques to the   |
|                            |                    | consistently well  | highest standard    |
| Understand the             | Demonstrate        | Demonstrate        | Demonstrate highly  |
| fundamentals of            | adequate           | robust             | comprehensive       |
| Differential Calculus      | understanding of   | understanding of   | understanding of    |
|                            | techniques         | techniques         | techniques          |
| Understand the             | Demonstrate        | Demonstrate        | Demonstrate highly  |
| fundamental of Integral    | adequate           | robust             | comprehensive       |
| Calculus                   | understanding of   | understanding of   | understanding of    |
|                            | techniques         | techniques         | techniques          |
| Understand Measures of     | Demonstrate        | Demonstrate        | Demonstrate highly  |
| Dispersion                 | adequate           | robust             | comprehensive       |
|                            | understanding of   | understanding of   | understanding of    |
|                            | techniques         | techniques         | techniques          |
| Understand the             | Demonstrate        | Demonstrate        | Demonstrate highly  |
| fundamentals of            | adequate           | robust             | comprehensive       |
| Probability                | understanding of   | understanding of   | understanding of    |
|                            | techniques         | techniques         | techniques          |

### Grade descriptors for Study and Communication Skills

| Learning Outcome         | Pass               | Merit               | Distinction            |
|--------------------------|--------------------|---------------------|------------------------|
| Be able to take          | Demonstrate        | Demonstrate ability | Demonstrate ability to |
| effective notes from a   | ability to perform | to perform the task | perform the task to    |
| variety of sources       | the task           | consistently well   | the highest standard   |
| Understand how to        | Demonstrate        | Demonstrate robust  | Demonstrate highly     |
| work out the meaning     | adequate level of  | level of            | comprehensive level    |
| of unfamiliar content    | understanding      | understanding       | of understanding       |
| Understand common        | Demonstrate        | Demonstrate robust  | Demonstrate highly     |
| steps in producing       | adequate level of  | level of            | comprehensive level    |
| academic work            | understanding      | understanding       | of understanding       |
| Be able to produce a     | Demonstrate        | Demonstrate ability | Demonstrate ability to |
| piece of academic work   | ability to perform | to perform the task | perform the task to    |
| suitable for this level, | the task           | consistently well   | the highest standard   |
| following a drafting     |                    |                     |                        |
| process                  |                    |                     |                        |
| Understand different     | Demonstrate        | Demonstrate robust  | Demonstrate highly     |
| learning styles          | adequate level of  | level of            | comprehensive level    |
|                          | understanding      | understanding       | of understanding       |
